

CHECKLIST

Data check BEFORE print approval

TEXTS, FONTS AND CONTENT

Proofread your texts again, paying attention to spelling, comma placement, font and font size, and accuracy of content. Check the document for completeness and position of the content.

COLORS

The file delivered to you is not applicable for color, print and material quality. Please note that color reproduction may differ on non-calibrated output devices such as monitors or printers.

DIMENSIONING

Check the dimensions of the endcut, the position of the buttons and the cutouts, which are created and dimensioned in the release layout, with a scale of 1:1.

SPECIAL FEATURES

Please also check that the position or size of any adhesive recess, embossing areas, UV window or transparent areas are correct.

DIGITALPRINT

IMAGES

If there are images in your layout, please check them for correct position and quality.

AVOID MISTAKES

Typos and font errors can be easily avoided. We recommend that you send us texts or graphics as vector data. If you do not use standard fonts, please convert them to curves so that no problems can occur during data transmission. If it is not possible to convert fonts, please provide us with the fonts used in your layout.
